Education

Northeastern University, *Khoury College of Computer Sciences,* Boston, MA **Expected:** May 2027

Honors Candidate for B.S. in Computer Science and Business Administration, Concentration in Finance **GPA:** 3.78/4.00

Courses: Algorithms & Data, Software Engineering, Object-Oriented Design, Database Design, Data Science, Statistics, Fintech

Technical Skills

Languages | Python, SQL, TypeScript, JavaScript, Java, Bash, HTML/CSS
AI & ML | Claude API, OpenAI API, Tool Calling, LLM Evals, Prompt Engineering, Pinecone, Azure AI Search, Scikit-learn, Pandas
Frameworks & Libraries | Next.js, React, Node.js, FastAPI, Django, Tailwind CSS, AG Grid, QuantLib, Vitest, Playwright, pytest
Data & Tools | PostgreSQL, TimescaleDB, Redis, Bloomberg EMSX + API, Microsoft Graph, Git, GitHub Actions, Docker, Linux

Work Experience

Liminality Capital LP, *AI Software Engineer*, Boston, MA Jul 2026 – Oct 2026

- Built the firm's **production order management system** across every asset class it trades, used daily by the PMs and traders
- Launched **AI trade entry** on the **Claude API**, turning plain-English orders into validated multi-leg tickets with AI review
- Designed an AI data tool turning natural-language requests into validated data grids over 8 datasets, passing **95/95 eval cases**
- Engineered an **LLM reconciliation pipeline** that reads broker emails via Microsoft Graph, matches fills, and flags breaks
- Integrated **Bloomberg EMSX** in production via a Python desktop agent that routes approved orders and syncs all fills back
- Backed every feature with **4,200+ automated tests**, LLM eval suites rerun on each prompt change, and GitHub Actions CI

Liminality Capital LP, *AI Software Engineer Co-op*, Boston, MA Jun 2025 – Dec 2025

- Automated **~80% of hedge fund workflows** with end-to-end trading infrastructure spanning data, risk, pricing, and analytics
- Developed multi-asset ETL pipelines ingesting **Bloomberg, Citi, and JPM data** into a PostgreSQL + TimescaleDB database
- Implemented institutional analytics platforms for P&L, correlation, scenario, and risk analysis across **2,000+ instruments**
- Created **FX option and swaption pricing tools** with scenario analysis, Greeks, and volatility surfaces used to monitor trades
- Deployed **AI-powered SQL + document search** enabling natural-language analysis of positions, P&L, and transactions

StatArb Research Engine, *Project Manager*, Boston, MA Jan 2026 – Apr 2026

- Led a **7-person developer team** to build a research platform for a quantitative hedge fund, owning the product roadmap
- Served as **sole client liaison** to firm stakeholders, delivering weekly demos while managing 3 teams through sprint cycles
- Shipped a full-stack system automating **pair screening, signal generation, and backtesting**, replacing manual workflows
- Architected **Redis + RQ job queues** with Dockerized workers and hash-keyed caching for repeat backtests and signal runs

EduFlexAI, *Software Developer*, Boston, MA Jan 2025 – Jun 2025

- Delivered features for an **AI-driven learning platform** on a 5+ dev team using Next.js, Django, PostgreSQL, and OpenAI
- Rolled out a "Learn" page with **GPT-driven**, file-based personalized help, context-aware explanations, and code reviews
- Powered a dynamic resource aggregator with **Pinecone vector embeddings** to surface curated videos, articles, and materials
- Containerized the platform with **Docker** and built scalable CI/CD pipelines to accelerate development and deployment cycles

Oasis at Northeastern, *Software Developer (Machine Learning)*, Boston, MA Jan 2024 – Apr 2024

- Trained an ML model predicting NBA game winners with **~65% accuracy** using the NBA API, Scikit-learn, and Pandas
- Improved model performance and correctness by engineering features such as **rolling averages and home/away splits**

Projects

Stock Portfolio Application, *Java* May 2024 – Jun 2024

- Coded a mock stock portfolio application in Java using the **Alpha Vantage API** to fetch real-time and historical stock data
- Added stock performance charts, portfolio composition and rebalancing, moving-average analysis, and buying/selling shares
- Structured the app with **MVC architecture** and the Command and Adapter design patterns to keep it modular and scalable

Additional Information

Activities & Skills: Financial Accounting TA, Dean's List, TAMID Group at Northeastern, BAPS Volunteer | Fluent in Gujarati
Interests: Tennis, Lifting, Basketball, Graphic Design, Hiking, Drawing, Baseball, Music, Football, Fashion, LEGOs, Cooking
