Boston, MA • [LinkedIn](#) • [GitHub](#) • (201) 486-2096 • [Personal Portfolio](#) • desai.puj@northeastern.edu

Availability: July 2026 – December 2026

Education

Northeastern University, *Khoury College of Computer Sciences*, Boston, MA

Expected: May 2027

Honors Candidate for B.S. in Computer Science and Business Administration, Concentration in Finance

GPA: 3.77/4.00

Courses: Object-Oriented Design, Algorithms & Data, Database Design, Information Presentation & Visualization, Foundations of Data Science, Fundamentals of Computer Science 1 & 2, Discrete Structures, Financial Management, Financial Accounting

Technical Skills

Languages | Python, Java, C++, SQL, JavaScript, TypeScript, Bash, HTML/CSS

Frameworks & Libraries | React, FastAPI, Django, Node.js, Next.js, PostgreSQL, QuantLib, Pandas, Scikit-learn, Pinecone, Flask

Services & Tools | Git, Docker, Redis, Azure AI Search + DevOps (CI/CD), Bloomberg API, OpenAI, Prisma ORM, Postman, Linux

Work Experience

StatArb Research Engine, *Project Manager*, Boston, MA

Jan 2026 – Apr 2026

- Leading a **7-person developer team** to build a research platform for a **quantitative hedge fund**, owning product roadmap
- Serving as **sole client liaison** to firm stakeholders, delivering weekly demos while **managing 3 teams** through sprint cycles
- Shipping a full-stack system **automating pair screening, signal generation, and backtesting**, replacing manual workflows

Liminality Capital LP, *AI Software Engineer Co-op*, Boston, MA

Jun 2025 – Dec 2025

- Coded end-to-end trading infrastructure **automating ~80% of hedge fund workflows** across data, risk, pricing, and analytics
- Engineered multi-asset **ETL pipelines** ingesting **Bloomberg, Citi, and JPM data** into **PostgreSQL + TimescaleDB**
- Developed institutional analytics platforms enabling P&L, correlation, scenario, and risk analysis across **2,000+ instruments**
- Created **FX option and swaption pricing tools** with scenario analysis, Greeks, and volatility surfaces used to monitor trades
- Integrated **AI-powered SQL + document search** enabling natural-language analysis of positions, P&L, and transactions

EduFlexAI, *Software Developer*, Boston, MA

Jan 2025 – Jun 2025

- Contributed to the development of an **AI-driven learning platform** using **Next.js, Django, PostgreSQL, and OpenAI**
- Developed a “Learn” page with **GPT-driven**, file-based personalized help, context-aware explanations, and code reviews
- Built a dynamic resource aggregator using **Pinecone vector embeddings** to surface curated videos, articles, and materials
- Architected scalable **Dockerized infrastructure and CI/CD pipelines** to accelerate development and deployment

Oasis at Northeastern, *Software Developer (Machine Learning)*, Boston, MA

Jan 2024 – Apr 2024

- Built ML model predicting NBA game winners with **~65% accuracy** using **NBA API, Scikit-learn, and Pandas**
- Improved model performance and correctness by engineering features like **rolling averages and home/away features**
- Presented and demoed project to **~100 members/sponsors**, explaining model development process and functionality

Projects

Chess, *Python*

Jul 2024 – Sept 2024

- Created a **PvP chess game** with **Pygame**, featuring multiple board themes, last-move highlighting, and valid moves display
- Engineered a modular, **scalable architecture** employing **OOP practices**, accelerating feature addition and reducing tech debt
- Implemented **core mechanics** like move validation, checkmate, stalemate, pawn promotion, en passant, and castling

Stock Portfolio Application, *Java*

May 2024 – Jun 2024

- Developed a mock **stock portfolio application** utilizing the **Alpha Vantage API** to fetch real-time and past stock data
- Implemented stock performance charts, portfolio composition and rebalancing, moving averages, and buying/selling shares
- Designed an intuitive **GUI** using **Java Swing**, ensuring a user-friendly experience for managing and viewing portfolios
- Built project using **MVC architecture** alongside the **Command Design & Adapter patterns** to ensure scalability

Additional Information

Activities & Skills: Dean's List, NU UTSAV, TAMID Group at Northeastern, BAPS Content Creator & Volunteer | Fluent in Gujarati

Interests: Tennis, Lifting, Basketball, Graphic Design, Hiking, Drawing, Baseball, Music, Video-Editing, Fashion, LEGOs, Cooking
